

PaintFlex® paint on the PE Product: Flexibility

22.Jul.2026

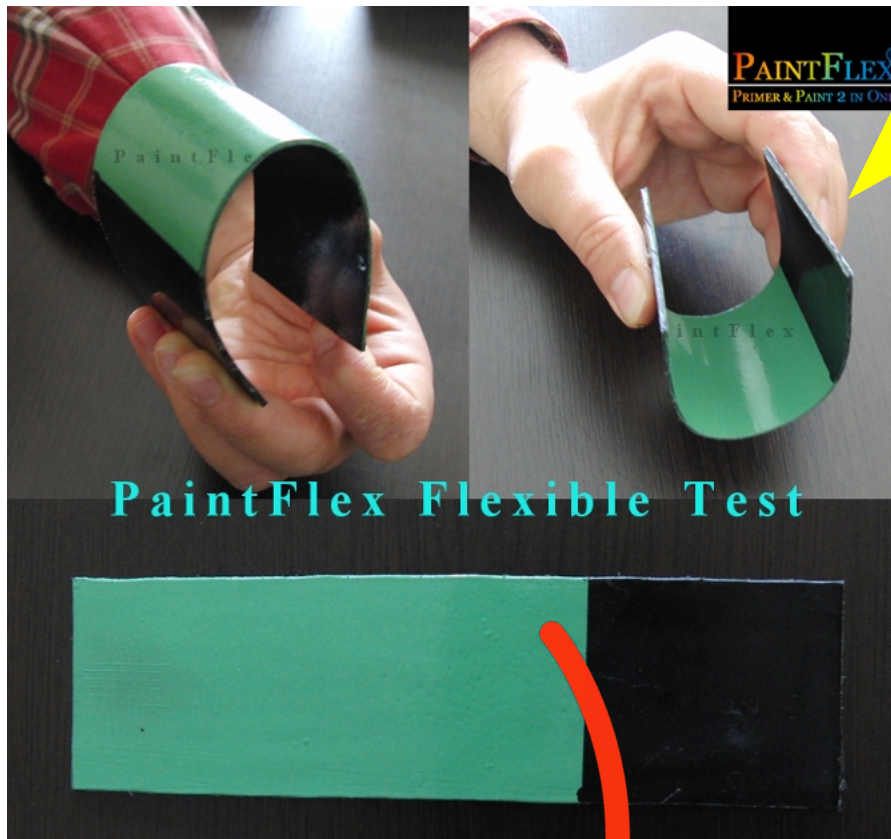

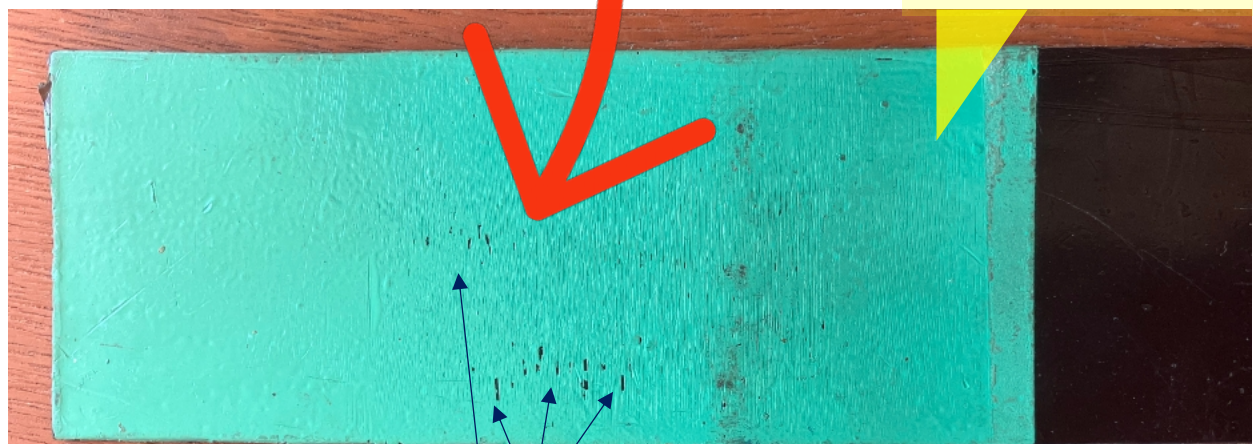

Photo: early 2014

Test for:
PaintFlex®
Flexibility on the
Polyethylene
Products.

Photo: 20 July 2026
We have been testing
this for over 12 years.
And it was bended
more than 1000times.

Tiny Micro Cracks have appeared on the surface of the Polyethylene product itself.

Paint was applied without any heating, corona chemical etching and special treatment.
Painting Equipment: Spray
