

A new era for EPP foam drones with the PaintFlex® Painting system

PaintFlex® is the liquid paint that can be applied directly to the surface of polyethylene & other hard to paint products. 04.Sep.2026

PaintFlex® opens up a wide range of possibilities for EPP foam.

PaintFlex®'s world-first and unique technology makes it possible to transform EPP foam drones into unique single-color and multi-colour RAL colours.

Furthermore, it is possible to apply camouflage patterns and other custom designs.

This process requires absolutely no heat treatment, such as flame treatment or corona discharge.
