Bonding dissimilar material: Polyethylene & Sticker powered by PaintFlex®

PaintFlex® is the liquid paint that can be applied directly to the surface of polyethylene & other hard to paint products.

13.Sep.2026

Bonding Self-Adhesive Sticker to polyethylene products painted with PaintFlex®.

- **Applied PaintFlex® Extra to Polyethylene product surface: 2013**
- **Bonded self-adhesive sticker onto polyethylene products painted with PaintFlex®: 2013**
- **Tear off Test: Tested by the factory president seven days after the stickers were applied**

Comments from the president of the plastic products manufacturing company that conducted this test:

"Using PaintFlex as an adhesion primer ensures a sufficiently strong bond between the sticker and the HDPE."

How to Bond:

Step 1. Apply PaintFlex® to the surface of the HDPE product to which you want to bond Self-Adhesive Sicker.

Step 2. Wait minimum 24hours (There is no time limit on the maximum waiting time.)

Step 3. Bonding Self-Adhesive Sticker onto Polyethylene products painted with PaintFlex®

You do **NOT** need to these methods for paint on HDPE Products:

- ⃠ Heat, Flame, Corona, Plasma and other heat related treatments
- ⃠ Primer for PaintFlex® Liquid Paint
