

Countless options on the Metal surfaces

Countless options on the Metal surfaces:

- PaintFlex® is specifically designed to
 - adhere to all types of Metals
 - ✓ New
 - ✓ Solid Rusted/ Corroded Metal surfaces
 - ✓ Stainless (included solid rusted stainless)
 - ✓ And other Metals
 - **without** needing pre-treatment of the metal's surface, such as sanding or priming.
- It creates a permanent flexible binding layer
 - ✓ against Rusting/ Corrosion
 - ✓ that Allows Standard Cosmetic & Functional paints like
 - PU/ Poly-urea
 - Scratching resistant Paint/Coating
 - And other Paint/ Coatingto be applied without sanding on the top.
- PaintFlex® is food and water contact friendly.
(official test report is available)
